“ The CATI Centre provides a convenient platform for dedicated researchers to conduct survey through computer-assisted telephone interviewing. By applying the sophisticated software installed in the CATI Centre, researchers can take advantage of its multi-functions including call scheduling, audio recording of the telephone interviews, etc.

I believe our colleagues will be benefited from the CATI facilities to improve their accuracy and efficiency in collecting data for their quantitative research studies. The CATI Centre can also let our students have hand-on experience in learning how to conduct telephone interviews in real life.

Dr. Karen Yeung
CATI Centre Manager

We are now recruiting student helpers to conduct telephone survey in CATI Centre. ***Come to join us if you are interested!***

Through RIB website, you can access the **booking guidelines**, **check availability** and submit **booking form**.
